 - assets or resources

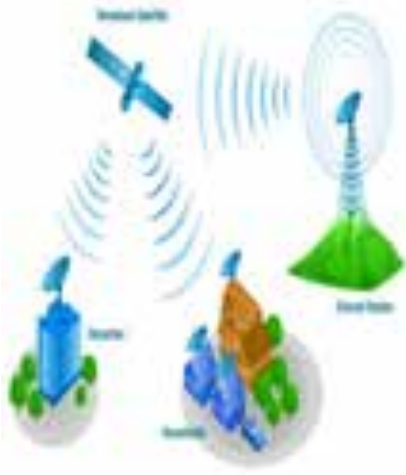

- ✓ BRIGHT CRM System is highly scalable and customizable, allowing businesses to gain actionable customer insights with a back-end [analytical engine](#), view business opportunities with [predictive analytics](#), streamline operations and personalize customer service based on the customer's known history and prior interactions with your business.
- ✓ BRIGHT CRM System is also used in the same way to manage business contacts, employees, clients, contract wins and sales leads.

BIS Business Intelligence (BI)

- ✓ Many organizations are Data Rich, but unfortunately, they also tend to be Information Poor. Understanding where to start analyzing your (Customer/patient) population can be a daunting task.
- ✓ Drive insight discovery with the data visualization app that anyone can use. With Bright BI System, everyone in your organization can easily create Flexible, Interactive visualizations and make meaningful decisions.
- ✓ Explore Simple & Complex data to find the hidden data relations you didn't know you could find.
- ✓ Easy Dashboards and simulating What If scenarios is our profession for a unique proposition.
- ✓ The promise of BI software is to enable decision makers at all levels in an organization to leverage data for business advantage—to Explore Data, Draw Insights and meaningful conclusions, and make better decisions.

BIS Networking & Communications

- Helping you to build and secure your computer networks to suit your business
- BIS provides the very best in network and security solutions to companies throughout the GCC countries. The right planning and implementation will improve your efficiency and reliability of your network and security. Your business is easier when you let BIS handles your network and security.

BIS Data Security

- BIS is the authorized partner of **FORTINET** in Qatar which provides our customers with the solutions and implementation of Network IP Security.
- Every day, business computer networks face new threats, such as spyware, malware, and hacker intrusions. It's more important than ever to protect your business network, and working with a managed security service is the simplest and most effective way to defend against these threats.
- Risk Mitigation: One of the most important tasks for any business in today's technological environment is risk mitigation. This ensures a minimum risk level for virus and malware infection, spyware infection, and hacker attacks.
- Increased Network Performance: The performance of computer networks is a vital issue for any company; downtime and lag cost money in more ways than one.
- Less Stress for Management Staff: Managing a network is definitely not easy, and the difficulty goes up as the intricacy of the network increases.
- Faster and More Proactive Resolution of Problems: Most business owners tend to take a reactive stance when fixing problems- they only spring into action when an issue arises.
- Lower Costs: Using a managed security service is more cost-effective than paying IT consultants on an hourly basis, or keeping full-time staff. Lower expenditures mean a better bottom line, and more ability to pass those savings on to your customers.

BIS IP Telephony & Connectivity Center

- **Avaya Partner**

BIS is the authorized partner of Avaya in Qatar which provides our customers with innovative solutions and implementation of business telephone systems and other unified communication system tools available at Avaya.

- **Desktop Phones**

Help your users (executives, managers, receptionists, walk-ups, and mobile and remote employees) stay connected, accessible, and productive all day. Avaya offers the broadest array of IP, digital, analog, wireless, and SIP desk phones.
