Indroduction

Bright Information Systems was established in Qatar in 1998, as an Applications Developer Company specialized in the Enterprise Resource Planning Solutions (ERP).

For over 20 years of Successful Business, BIS became one of the Highest Ranked vendors of the ERP solutions in Qatar , GCC and the Middle East. Moreover, for the high quality of its Products and its Services BIS has got the ISO Quality Certificate ISO 9001:2015.

Emerging and leading IT solution provider focusing on innovative Technology solutions that serves our partners and share positively in their business success. BIS firmly place technology edge, scalability, reliability, performance and security as the foundation for every solution or service that company provides. And thus, BIS has been consistently rated as one of the leaders in the industry development.

Bright's ERP true ambition is to integrate all departments and functions across a company. ERP combines all together the software program that serves the needs of people in finance as well as it does the people in sales, warehouse, human resources and in other departments so they can more easily share information, be more productive and smarter in decision-making.

Amazing employees deserve amazing software. BIS's ERP is the best management software to run in any sector. Thousands of happy users work better with our integrated Apps. Proud to be fully functional customizable Made in Qatar ERP Solution.

Bright ERP

BIS is one of the longest standing independent vendors of ERP software solutions in the Middle East.

Before undertaking an ERP implementation, it's critical to understand what the needs (and pain points) of your business are, and how a proposed solution will help you address them.

Successfully integrating a new ERP plan is not an easy task. Many companies struggle to find a balance between real-time and batch integration and external and internal ERP systems. Enterprise resource planning is a complex challenge and there are many points to consider before launching a new strategy.

POS System

When it comes to selling, it helps to have as much information about the customer and your products as possible. Using our Point Of Sale system, your company's sales staff can easily access a variety of useful customer information, including past purchase histories, credit card information, and much more. In addition, System can be set up to alert your sales staff when a customer exceeds a credit limit.

A hold can then be put on the order until the customer's standing with your organization improves. All this while processing quotes, sales orders, and invoices! Simply put, Bright's Point Of Sale system can increase sales efficiency and, in turn, lead to greater success.

If you are a supermarket retailer, departmental store retailer or restaurant owner, who are looking for a Point-Of-Sale solution, BrightPOS is the right answer to you. What ever your retail business may be, BrightPOS, has a version for you. BIS also offers specialized version for every kind of POS or Retail operation.If you are new for barcode scanning at the retail counters or you have already be a user of different system, well, this is perfect place for you.

01 User friendly design.

02 Customizable to perfectly suit your business.

03 Simplifying day to day operations through its ease of use built.

04 Record sales immediately & Quick in action.

05 Manage purchases & Control Inventory.

06 Data backup/restore feature to keep data safe.

07 Multiple Reporting tool & Easily Record Expenses.

08 Manages item pricing and offered discounts
